

FAN TERMINAL UNITS – Constant Volume (Series Flow), Standard Design

Models ACF w/o Coil
ACW w/Hot Water Coil
ACE w/Electric Coil

The **Carnes** constant volume fan terminal unit provides constant air volume to the space while retaining the advantages of a variable air volume system.

The primary air control assembly operates in the same manner as a standard throttling control valve when cooling loads are high. As cooling loads diminish the integral blower(s) induces warm ceiling plenum air to maintain constant air volume.

Features Include:

- Air flow capacities to 3700 CFM.
- Durable 22 gauge galvanized steel casing construction.
- Bottom access panel for internal components.
- Flange or slip and drive discharge connections.
- Forward curved centrifugal type fan assemblies with thermally protected, permanent split capacitor type 120 or 277 volt, single phase, fractional horsepower motors.
- Adjustable SCR fan speed control.
- Fan/motor assemblies are isolated from the casing using rubber isolators to minimize vibration transmission.
- Low leakage primary air damper design.
- Secondary air filter rack.
- Performance data based on tests conducted in accordance with ARI Standard 880-98.
- Air flow switch.
- All units are equipped with pressure independent pneumatic or electronic controls.
- Field adjustable P/E switch with pneumatic controls.
- Averaging type velocity sensor and calibration chart for measuring air flow through the primary air damper.
- Insulation is 1" thick, 1-1/2 lb. dual density fiberglass with surface treated to prevent air erosion, UL listed and meets NFPA 90A requirements.
- Damper controls and fan controls are located in one enclosure.
- ARI listed.
- Optional ETL listing.
- Optional secondary air sound baffle. Sound baffle is factory attached to secondary air inlet. (Contact Carnes)
- Optional one or two row hot water coils (Model ACW). Coil is factory attached to the unit discharge.
- Optional one, two or three stage electric reheat coils (Model ACE). Coil is factory attached to unit discharge or shipped separately for field mounting.
- Optional secondary air filters, Class I (re-usable) or Class II (throw away).
- Optional non-fused or fused fan disconnect switch.
- Optional foil coated insulation (Hospital, Laboratory, etc. applications).

Available Modules:

- Basic control unit — **Model ACF.**
- Basic control unit with hot water coil — **Model ACW.**
- Basic control unit with electric coil — **Model ACE.**

- NOTES:**
1. Δ Ps static pressure difference from inlet to discharge.
 2. The lowest value of Δ Ps is the minimum pressure required to deliver CFM shown with primary damper in wide open position.
 3. Δ Ps does not include hot water or electric coils.
 4. (--) indicates NC levels less than 10.

NC Levels are derived from tests conducted in accordance with ARI Standard 880-98 and are calculated in accordance with ARI Standard 885-98 as application data based on the following:

Discharge NC levels are based on —

- a) 5 foot rectangular 12" x 12" duct lined with 1" fiberglass insulation.
- b) 6 foot lined flex duct (8" diameter).
- c) Maximum of 300 CFM per outlet.
- d) Space effect factor (5000ft³) at 10 feet from outlet.
- e) End reflection.
- f) Environmental adjustment factor.

Radiated NC levels are based on —

- a) Plenum/ceiling effect - 5/8" mineral fiber tile, 35 lb/ft³ - 3 foot plenum
- b) Space effect factor (5000ft³) at 10 feet from source.
- c) Environmental adjustment factor.

FAN POWERED UNITS

- NOTES:**
1. ΔP_s static pressure difference from inlet to discharge.
 2. The lowest value of ΔP_s is the minimum pressure required to deliver CFM shown with primary damper in wide open position.
 3. ΔP_s does not include hot water or electric coils.
 4. (--) indicates NC levels less than 10.

NC Levels are derived from tests conducted in accordance with ARI Standard 880-98 and are calculated in accordance with ARI Standard 885-98 as application data based on the following:

Discharge NC levels are based on —

- a) 5 foot rectangular 12" x 12" duct lined with 1" fiberglass insulation.
- b) 6 foot lined flex duct (8" diameter).
- c) Maximum of 300 CFM per outlet.
- d) Space effect factor (5000ft³) at 10 feet from outlet.
- e) End reflection.
- f) Environmental adjustment factor.

Radiated NC levels are based on —

- a) Plenum/ceiling effect - 5/8" mineral fiber tile, 35 lb/ft³ - 3 foot plenum
- b) Space effect factor (5000ft³) at 10 feet from source.
- c) Environmental adjustment factor.

FAN POWERED UNITS

- NOTES:**
1. Δ Ps static pressure difference from inlet to discharge.
 2. The lowest value of Δ Ps is the minimum pressure required to deliver CFM shown with primary damper in wide open position.
 3. Δ Ps does not include hot water or electric coils.
 4. (--) indicates NC levels less than 10.

NC Levels are derived from tests conducted in accordance with ARI Standard 880-98 and are calculated in accordance with ARI Standard 885-98 as application data based on the following:

Discharge NC levels are based on —

- a) 5 foot rectangular 12" x 12" duct lined with 1" fiberglass insulation.
- b) 6 foot lined flex duct (8" diameter).
- c) Maximum of 300 CFM per outlet.
- d) Space effect factor (5000ft³) at 10 feet from outlet.
- e) End reflection.
- f) Environmental adjustment factor.

Radiated NC levels are based on —

- a) Plenum/ceiling effect - 5/8" mineral fiber tile, 35 lb/ft³ - 3 foot plenum
- b) Space effect factor (5000ft³) at 10 feet from source.
- c) Environmental adjustment factor.

in the ARI 880
Certification Program

MODEL NUMBERING – Constant Volume (Series Flow), Standard Design

FAN POWERED UNITS

NOTE: Hand of controls is determined by facing the averaging flow sensor (inlet of the unit) with the supply air hitting the back of your head.

Electronic Thermostat

A Carnes Electronic Thermostat **must be ordered** with the Electronic ET Control Option.

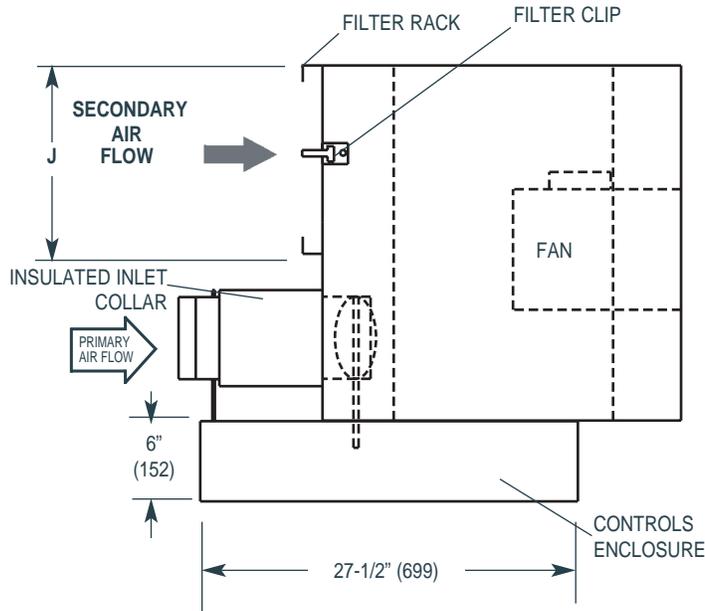

CONTROLS AND DAMPER ARRANGEMENT

- *1 - Normally Open - Right Hand Controls (Electronic/DO, DE, ET)
(All Pneumatic Control Types for Reverse Acting Thermostat)
- *2 - Normally Open - Left Hand Controls (Electronic/DO, DE, ET)
(All Pneumatic Control Types for Reverse Acting Thermostat)
- 3 - Normally Closed - Right Hand Controls (All Pneumatic Control Types for Direct Acting Thermostat)
- 4 - Normally Closed - Left Hand Controls (All Pneumatic Control Types for Direct Acting Thermostat)
- 5 - Normally Open - Right Hand Controls (All Pneumatic Control Types for Direct Acting Thermostat)
- 6 - Normally Open - Left Hand Controls (All Pneumatic Control Types for Direct Acting Thermostat)
- 7 - Normally Closed - Right Hand Controls (All Pneumatic Control Types for Reverse Acting Thermostat)
- 8 - Normally Closed - Left Hand Controls (All Pneumatic Control Types for Reverse Acting Thermostat)

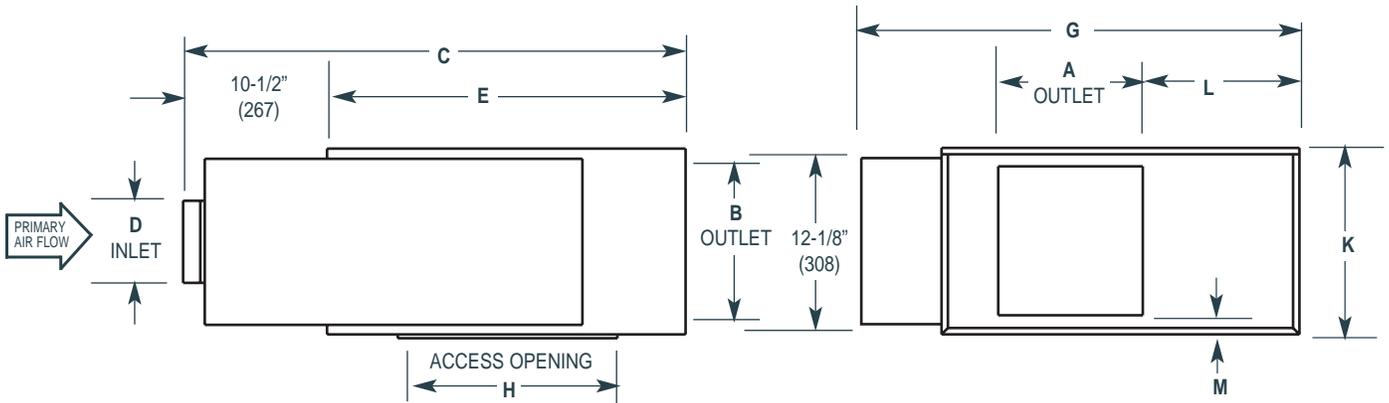

*Electronic and DDC Units DO NOT Fail Open. "1" or "2" is used for Right or Left Hand Only. Electronic Units are shipped with the Damper in Open Position.

DIMENSIONAL DATA – Constant Volume (Series Flow), Standard Design

FAN SIZES A - F

RIGHT HAND PRIMARY AIR UNIT SHOWN. LEFT HAND AVAILABLE.
