

- Fan and light operate together when control is turned on. Fan continues to operate for a set time period. Adjustment is made by adjusting the variable resistor located under the switch plate (user adjustable from 5-60 minutes) after Fan or light is turned off.
- Center position turns fan and light off immediately.
- Can be used with a fan only.
- Fits single gang box.
- 120V, 60 cycle, 4A fan and 4A light capacity.
